Gore Mutual's 2024 Sustainability Report is here

We're proud to share our 2024 Sustainability Report—our third annual publication and a reflection of how we're embedding sustainability and purpose into our business to support you, our broker partners.

This year's report highlights how we're building a stronger, more resilient mutual—one that's purpose-driven and broker-empowered. Here are a few key takeaways:

- **Broker Councils launched** in Ontario and BC to ensure your voice shapes our products and services.
- **Purpose Partnership research** expanded to support brokers in integrating purpose into their strategies.
- Over \$150,000 donated through our broker matching program, amplifying local impact across communities.
- More than 3,200 volunteer hours logged by Gore Mutual employees—many alongside brokers.
- **Co-operators joined Gore Mutual** as the national partner in the Climate and Equity Lab, recognizing its meaningful work in addressing how climate change disproportionately affects vulnerable urban Canadians and advancing community-led climate resilience

Our purpose in action

Our purpose—Insurance that does good—is more than a tagline. It's a framework that guides how we work with you:

- **Be Good**: Strengthening governance, DEI, and aiming for net-zero operations by 2035.
- **Do Good**: Embedding ESG into underwriting, claims, and procurement.
- **Spread Good**: Investing over \$1.2 million in community initiatives, with 81% employee volunteer participation—many alongside brokers.

Explore how our shared values are driving real impact: Read the 2024 Sustainability Report.
